DETAILED ACTION

1. The amendment filed March 25, 2003 in Paper No. 4 is acknowledged and has been entered. Claims 1-21 have been canceled. Claims 22-34 have been added.

2. Claims 22-34 are pending in the application and are currently subject to the following restriction.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I. Claims 22-34, insofar as the claims are drawn to a recombinant soluble T cell receptor comprising a TCR α chain extracellular domain comprising a heterologous C-terminal dimerization domain and a TCR β chain extracellular domain comprising a heterologous C-terminal dimerization domain, classified in class 530, subclass 350.
 - Group II. Claims 22-34, insofar as the claims are drawn to a recombinant soluble T cell receptor comprising a TCR α chain extracellular domain comprising a heterologous C-terminal dimerization domain and a TCR δ chain extracellular domain comprising a heterologous C-terminal dimerization domain, classified in class 530, subclass 350.
 - Group III. Claims 22-34, insofar as the claims are drawn to a recombinant soluble T cell receptor comprising a TCR γ chain extracellular domain comprising a heterologous C-terminal dimerization domain and a TCR β chain extracellular domain comprising a heterologous C-terminal dimerization domain, classified in class 530, subclass 350.

Group IV. Claims 22-34, insofar as the claims are drawn to a recombinant soluble T cell receptor comprising a TCR γ chain extracellular domain comprising a heterologous C-terminal dimerization domain and a TCR δ chain extracellular domain comprising a heterologous C-terminal dimerization domain, classified in class 530, subclass 350.

- 4. The inventions are distinct, each from the other because of the following reasons:

 The inventions in groups I-IV are disclosed as biologically and chemically distinct,
 unrelated in structure and/or function, and/or made by and/or used in different methods,
 and therefore the claimed products are distinct.
- 5. Because these inventions are distinct for the reasons given above and also because the search required for any one group is not required for any other group and/or the inventions have acquired a separate status in the art as shown by their different classification or their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
